### 10X TRUE DAY/NIGHT PERFORMANCE SERIES PTZ

The Performance Series cameras round out Honeywell's video portfolio with a variety of indoor, outdoor and low light models that let you pick the perfect camera for virtually any installation. Ideal for a diverse range of applications, the Performance Series includes a wide range of high performing IR bullet cameras and mini-domes. And now, we are pleased to announce the addition of the HDT pan/tilt/zoom dome.

The HDT Performance Series PTZ dome is a truly adaptable unit that's aesthetically pleasing. Its small form factor remains virtually unnoticed in varying indoor surveillance applications. The True Day/Night HDT comes with a 10X optical zoom lens and 470 TVL of resolution.

The HDT Performance Series PTZ dome is very easy to install and even easier to use. It's equipped with its own "ready to go" fly lead for rapid installation, saving time on site or allowing more commissioned domes per day. The unit is dual powered by 12 VDC/24 VAC and low powered at 9.6 W, and it's still able to respond to surveillance requirements at 360° per second through the full pan of 360° continuous.

#### Market Opportunities

The HDT Performance Series PTZ dome is a low profile unit suited to areas where a larger dome is impractical. It's even smaller than many fixed mini-domes in the market. The HDT PTZ is perfect for applications that may require the aesthetics of a mini-dome but full PTZ functionality. It is also great for retailers or in environments where customers and visitors are monitored.
