

## HRXD Series

### High Speed Multi-Channel Digital Video Recorders

Honeywell introduces the new HRXD Series of multi-channel digital video recorders. The HRXD Series features a 9 and 16 channel embedded DVR that supports an image-per-second (ips) recording rate of 240/200 (NTSC/PAL). And with Honeywell's exclusive XtraStor compression technology, you no longer have to sacrifice image quality, because less hard drive space is needed for long-term storage! With Honeywell's new multi-channel DVRs, we offer advanced CCTV technologies for businesses of all sizes.

Honeywell's HRXD Series supports a wide variety of surveillance applications by offering a full-featured and highly customizable digital video recording platform. Its PTZ capabilities can be controlled directly from the DVR's front panel or remotely using Remote Administration System Plus software (RASplus). The infrared remote control speeds installation, streamlines system configuration, and enhances user experience.

#### Market Opportunities:

With the growing demand for surveillance applications to operate multiple cameras at high recording rates, the HRXD Series is ideal for environments requiring large volumes of detailed data to be captured at high speeds. Fast moving objects such as tours of PTZ cameras, people in motion, or moving vehicles are a perfect fit for the HRXD Series. Ideal target markets include:

- Retail
- Law Enforcement
- Financial
- Education

#### CUSTOMER BENEFITS

- Captures more images per second per camera
- Stores more video on an equal amount of hard drive storage space
- Allows operators to find video evidence quickly
- Easily transfers video evidence onto a CD-ROM or USB FLASH drive for viewing on virtually any PC

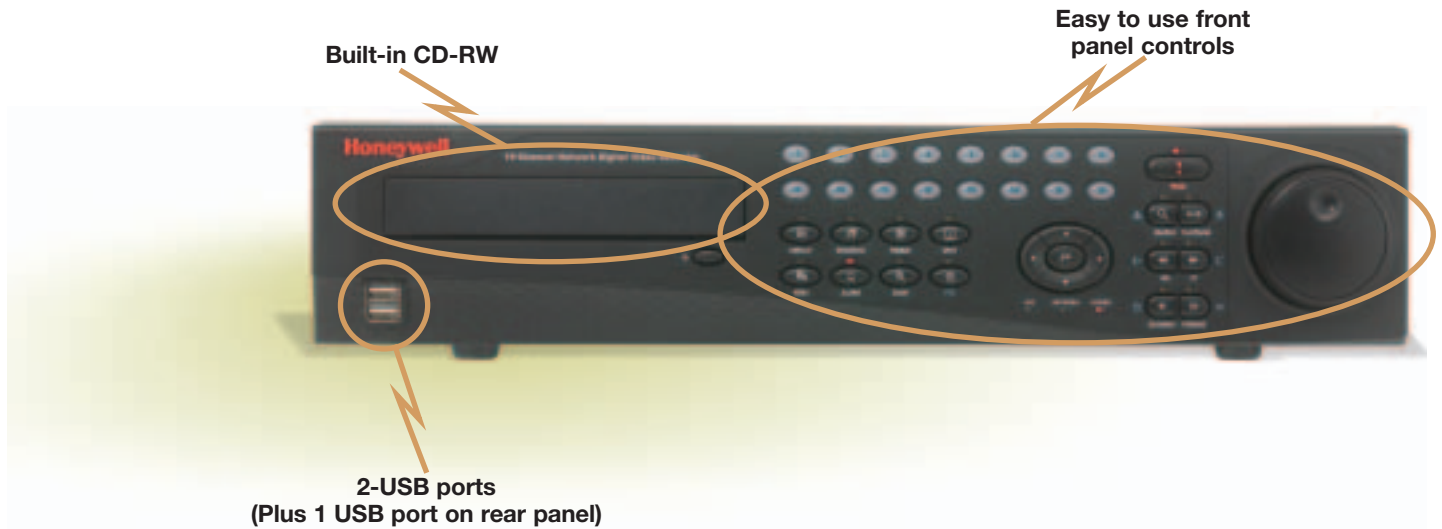

#### HRXD Series Features:

- Long-term video storage using Honeywell's exclusive XtraStor technology
- Video archiving via Ultra Wide SCSI interface
- Remote access through PSTN, LAN/WAN (internal NIC), DSL and ISDN (RASplus software included)
- Records up to 240/200 ips NTSC/PAL
- Continues recording while archiving, transmitting to remote site, and playback
- Three-year warranty
