

## Get more. For less.

### HTR1 Mobile Video Cassette Recorder

Our new HTR1 mobile VCR is loaded with more features than ever but it's priced more attractively. It's the ideal solution for any vehicle that needs to be monitored reliably. The new HTR1 mobile VCR is easy to install, easy to use, and allows for inexpensive implementation and operation of mobile video recording solutions. HTR1 helps you get more—for less!

HTR1 features an industrial-grade VCR housed in a tamper resistant enclosure. Depending on the requirements of your application, you can use one or two cameras. HTR1 accepts up to five input signals, and any one of those five signals can be used to switch the camera inputs. The exclusive Tool Tips feature helps you program the VCR easily and be operational in a matter of minutes. In addition to recording up to nine hours on a VHS T180 tape, the HTR1 also offers an optional GPS system – not a common feature in this class of VCRs.

#### Product Features:

- Five status inputs (e.g., brakes, stop lights, turn signals and stop arm)
- Optional GPS module records position, direction and speed
- Optional second camera allows recording of school bus stop arm violations
- Front mounted video and audio output jacks
- Easy programming with included remote control—no switches to set, no need to remove the recorder from the platform
- Activates with ignition

#### CUSTOMER BENEFITS:

- High functionality at a competitive price
- Basic feature set solves surveillance needs for small or large fleets of vehicles
- Simple installation and operation
- Flexible mounting, vertical or horizontal
- Reliability and durability offer peace of mind

# HTR1

## Mobile Video Cassette Recorder

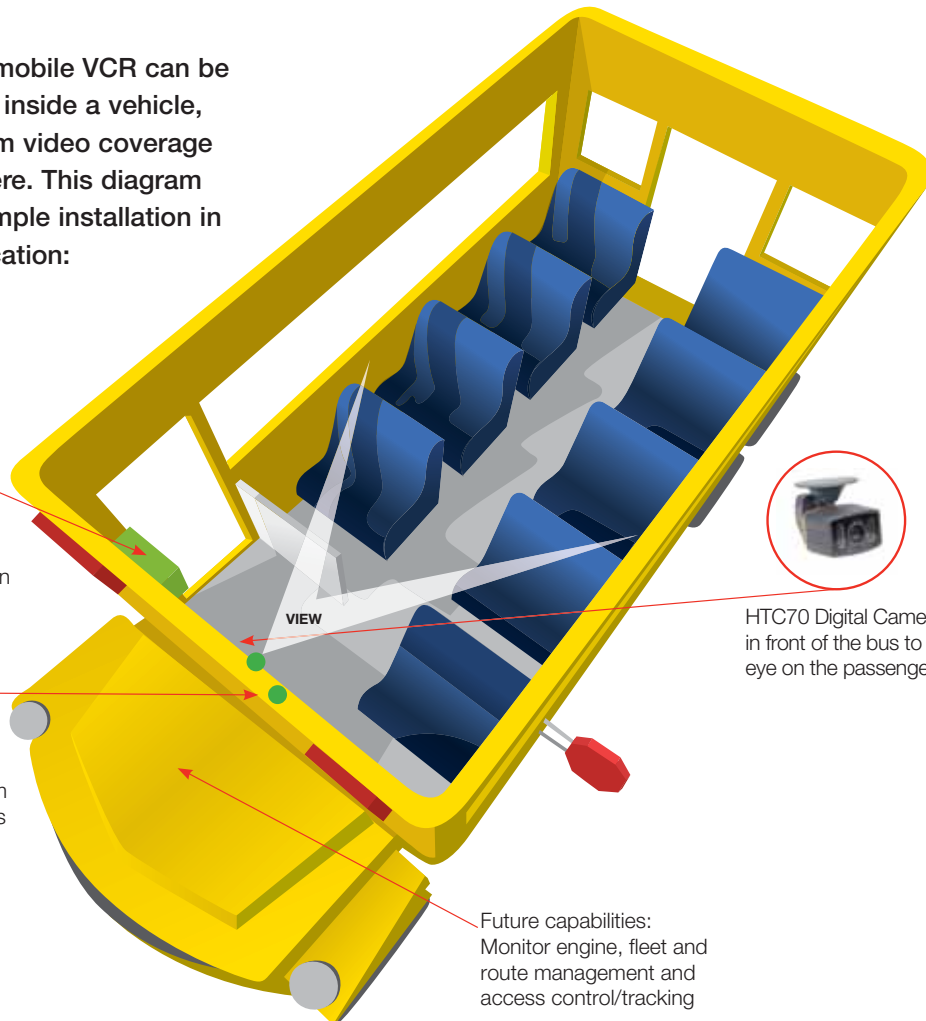

Honeywell's HTR1 mobile VCR can be mounted anywhere inside a vehicle, giving you maximum video coverage — anytime, anywhere. This diagram demonstrates a sample installation in a school bus application:

HTR1 Mobile Video Cassette Recorder collects detailed information

Global Positioning System (optional) antenna records speed, position, time and direction

HTC70 Digital Camera mounts in front of the bus to keep an eye on the passengers.

Future capabilities:  
Monitor engine, fleet and route management and access control/tracking
