

New L-Series LCD Monitors

Right on the Money

Our new L-Series LCD monitors offer all the essential functionality you need without any embellishments that drive up the price. Honeywell's new L-Series LCD monitors are uniquely designed to provide crisp images through a large viewing area and high resolution. So you can keep your eye on what's going on around you--and it won't cost you an arm and a leg.

The new L-Series LCD monitors are easy to install, easy to use, and allow users to inexpensively implement and operate their video display system. These professional grade units are specially designed to provide excellent image quality. The monitors provide good full-motion video with fast pixel response time, and they offer excellent video performance that is more affordable to a wider range of applications than any other display solution in its class.

Market Opportunities:

These monitors are the perfect choice for delivering exceptional picture quality in:

- Commercial markets
- Residential installations
- Retail sites
- Educational facilities

Product Features:

- High resolution SXGA 1280 x 1024
- 8 ms response time eliminates ghosting in motion video
- High brightness
- Available in 17" or 19" sizes
- Good contrast ratio, 500:1

Customer Benefits:

- Excellent image reproduction at a very attractive price
- Basic feature set solves surveillance needs for small or mid-sized installations
- Simple installation and operation

New L-Series LCD Monitors

Right on the Money

Because they offer lower energy consumption and more than double the useful screen life compared to a CRT display, our new L-Series monitors offer measurable financial savings over the lifespan of the product. This translates to a reduced total cost of ownership—an important factor in today's rising cost of maintaining effective security. The following chart compares the direct and indirect cost savings of an LCD display to a CRT monitor:

	19" LCD Display	21" CRT Display
Electric Consumption	50 watts	67 watts
Cost of Consumption*	\$43.80	\$58.69
Average Life	50,000 hours	20,000 hours
Product Replacement Per Year	0.18	0.44
Replacement Equipment Cost	\$495.00	\$290.00
Replacement Labor Cost**	\$80.00	\$80.00
Total Yearly Operational Cost	\$144.54	\$220.75

* Based on 8,760 hours use per year at \$0.10/kw/hr

** Labor cost calculated at \$80 per monitor
