

MAXPRO® Cloud

Honeywell

CLOUD HOSTED VIDEO SERVICES
TO PROTECT YOUR BUSINESS

Video – Anytime, Anywhere

Video in the cloud

Anytime, **Anywhere**

Why the Cloud?

The cloud is everywhere. Whether you're using a PC, Mac, tablet or smartphone, we use cloud services every day. And now, the cloud is even impacting how people manage their security systems. Cloud hosted video is ideal for anyone who manages a single location or multiple locations and can't be tied down to an office.

MAXPRO® Cloud lets you watch live and recorded video anytime, anywhere there is an Internet connection. Log in to our secure web page and start viewing your video—or combine views from multiple cameras at one site or from many locations to create the custom view that's right for you.

GET YOUR VIDEO WHEN
YOU NEED IT MOST

Protect **Your Investment**

MAXPRO® Cloud can monitor your alarms and events while keeping an eye on the performance of your video systems — without special infrastructure or IT costs.

Advanced video management without the investment

- View multiple sites from a single user login
- Connect multiple sites to form a virtual video network
- Minimal bandwidth impact on your network, ensures your system won't strain your network
- Eliminate the need for wide area networking between video systems across multiple sites
- Smart Video Motion Detection reduces false alarms, recording time and bandwidth requirements

Meet your needs now and in the future

- Automatic software updates provide users with the latest new features automatically without having to buy new equipment or pay for a service call
- Scalable storage allows you to buy what you need, when you need it
- Hybrid design protects your investment by letting you use existing cameras and adding high definition cameras as your needs change

Peace of Mind

You can relax knowing that your business is safe and your video will be there when you need it most.

Unique features help you enhance operational efficiencies and reduce management costs

- No software to install and maintain, simply access your video from any Internet connection
- Unique diagnostic feature monitors your system's performance and can instantly notify you and your dealer if communication is lost or video is not being recorded
- Automatic email notification of alarms and events that may require your immediate attention – your system is watching, even when you are not
- Our MAXPRO® Connect feature allows only authorized users to access your video and without compromising the security of your network and firewall

MAXPRO® Cloud

The last video system you'll ever need.

- Video on the Go with MAXPRO® Mobile for iPhone® and iPad®
- Intuitive user interface with easy to use click and drag cameras
- Manage and view video from multiple locations through a single user login
- Fast playback of video alarms and events
- Convenient video clip export tool
- Scalable storage using off-the-shelf devices
- Single click selection for multiple viewing options
- Simple search for the most current events
- Advanced search functionality for longer term events
- Alarm and event notification via email
- Automatic feature and service updates
- System health monitoring for lost cameras or communications

How Does It Work?

MAXPRO Cloud provides secure access to your video through the cloud. Video stored on-site is accessed through a user login from the Honeywell Cloud Hosting Center.

Get in the cloud today!

If your ready to change the way you manage your security, sign up for a free demo at www.maxprocloud.com. Make the move to the cloud. Anytime, Anywhere.
