

MAXPRO® IP Solutions

Honeywell's expanded MAXPRO® family of scalable IP video surveillance solutions includes a video management system, a full line of network video recorders, cloud-based services and mobile apps. It's the first complete portfolio of IP video management hardware and software that's easy to use and scalable for small and large applications. The MAXPRO platform is fully open, incorporating PSIA and ONVIF standards, native integration for third-party cameras and encoders, and RTSP (real time streaming protocol).

MAXPRO® VMS

MAXPRO® VMS integrates video cameras, alarm systems and access control to quickly and accurately detect threats and areas of risk.

- Offers one command and control interface that brings together analog, digital and network video devices
- Maximizes the value of Honeywell's complete security offering with integration to Pro-Watch® security management, intrusion systems, and recording devices
- Open architecture affords ultimate flexibility to let third party providers and security/IT manufacturers integrate with the MAXPRO VMS platform

MAXPRO® NVRs

The MAXPRO NVR family is ideal for entry to enterprise IP video surveillance systems, and it's based on the MAXPRO VMS user interface for a feature-rich and user-friendly experience that enables users to "Learn One, Know Them All."

Boxed NVRs: XE, SE, PE

- XE (Xpress Edition):
Entry level, 8/16 channel support
- SE (Standard Edition):
Mid-tier, 32 channel support
- PE (Professional Edition):
Enterprise, 32/64 channel support—*Coming Soon*

Software only NVRs

- Base software/license:
4, 8, 16 or 32 channel support
- Upgrade licenses to add 1, 4, 8 or 16 channels

MAXPRO® Cloud

Honeywell's new MAXPRO® Cloud hosted video service lets users manage video using any PC, Mac, smartphone or tablet connected to the Internet.

- Future-proof design ensures automatic system updates
- Minimal investment and complexity
- Reduces installation and service time and costs
- Ensures continued productivity and the peace of mind in knowing video is always available—*Anytime, Anywhere*

MAXPRO® Viewer

MAXPRO® Viewer, the latest addition to our MAXPRO family, is a freeware software application that allows multi-site viewing of Honeywell recorders including MAXPRO NVR, Rapid Eye™, Fusion, HRDP and HRXD series.

- Allows recorders to be grouped and viewed simultaneously through salvos and on multiple monitors
- Creates a single command point where video and events can be viewed from a single user interface

IP Cameras

Honeywell has IP cameras for every application: VGA, HD (720p and 1080p) and Wide Dynamic. Choose IP for outstanding HD image quality at minimal bandwidth. And our Honeywell Open Technology Alliance (HOTA) enables open exchange of technology between security and IT manufacturers.

www.honeywell.com/security/HOTA

MAXPRO® Mobile

The MAXPRO® Mobile app allows users to connect to a MAXPRO NVR from a remote location. Operators can use the app to perform common daily tasks such as viewing live video from one or multiple cameras and zooming in for full screen viewing.

- Allows recorders to be grouped and viewed simultaneously through salvos and on multiple monitors
- Creates a single command point where video and events can be viewed from a single user interface

ENTERPRISE SECURITY INTEGRATION

Pro-Watch® 3.81 Suite

Selected by top resellers in 2011 as a Best Channel Product by Business Solutions Magazine, Pro-Watch® protects people, secures assets and ensures regulatory compliance by combining visitor management, access control, digital video, intrusion and other functions into one powerful system.

Pro-Watch® 3.81

The new release supports virtual environments to reduce server management expenses and increase system uptime. Open architecture drives effortless integration to any third party system, resulting in increased efficiencies in energy management and operations. And the new single door controller lets users quickly and easily expand a system by adding one door at a time, making it even more affordable.

MAXPRO® VMS

New release integrates with MAXPRO VMS as well as with video cameras, alarm systems, floor plans and access control systems to quickly and accurately detect threats and areas of risk.

Pro-Watch® Integration Kit

The Pro-Watch® Integration Kit, powered by the Niagara[®] Framework[®], uses open architecture to integrate third-party products for increased productivity and enhanced monitoring of security, fire/life safety and energy management.

- Helps authorized HIS integrators increase profitability and maintain a competitive edge by offering customized apps that meet the unique needs of end users
- Allows Pro-Watch to interrelate with organizational systems to tighten security and enhance business processes
- Allows security staff to manage multiple systems from a single interface, leading to higher productivity

CRITICAL INFRASTRUCTURE

Vindicator® Standard Edition (SE)

Critical infrastructure sites around the world rely on Vindicator® technologies for complete situational awareness and intelligent intrusion detection, integrated with access control and video surveillance. Operators can now use a single workstation to manage map-based security event information gathered from interior and perimeter intrusion, video detection, access control and fire systems. The Vindicator Standard Edition security platform includes:

- Vindicator Command & Control (VCC) 2.0 System Management Suite
- V3 Intrusion Detection System (IDS)
- V3 Access Control System (ACS)
- Security Archive Workstation (SAW) 2.0 Reporting Suite
- Vindicator Badge Manager (VBM) 2.1
- UHS-Net family of gateways and transponders

BUILDING MANAGEMENT INTEGRATION

Rapid Eye™ Driver

The new Rapid Eye™ Driver is an innovative Rapid Eye product extension built on an open framework. Designed to integrate with protocols from diverse manufacturers, Rapid Eye Driver seamlessly integrates video into a unified building management solution – creating complete interoperability between video, security, lighting, energy management, and building automation for any facility.

- Integrates with the industry-leading Niagara^{AX} Framework[®]
- Integrates video into the Pro-Watch Integration Kit
- Enables users to remotely access and monitor their video from virtually any location via Internet Explorer and creates an interface to Rapid Eye

COMMERCIAL SECURITY INTEGRATION

WIN-PAK® SE/PE 3.0

WIN-PAK 3.0 combines all the power of access control, digital video, and intrusion in a single user interface. It's available in two editions: Standard (SE) and Professional (PE).

- All-in-one security integration helps users spend less time managing their system and more time focusing on their business
- Increased access control support including NetAXS-123 and NetAXS-4 gives users full control and increased functionality
- Video integration with MAXPRO NVR XE/SE provides users with add-on video support for current systems
- Redesigned video interface screen increases security response time by making it easier for users to view live video

Managed Access Control

Managed access control by Honeywell offers dealers an increased potential for growing their business and maximizing the value of each sale. Provide customers the benefits of a professionally managed and monitored access control system—and earn RMR at the same time.

- Remotely manage end users' access control systems
- Decrease installation and service costs
- Dealer hosted software platform
- Remote access via web browser

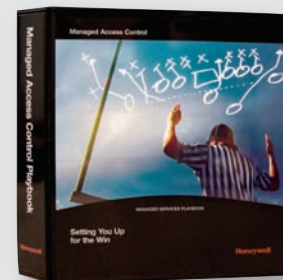

Managed Access Control Playbook

Just for Dealers!

We offer tools and training to help drive business with managed access control.

Honeywell's Managed Access Control Playbook covers:

- Step 1: What is Managed Access
- Step 2: How to Implement
- Step 3: How to Sell

NetAXS-123 with Video

Adding video to an access control system doesn't have to be difficult or expensive. NetAXS-123 with Video offers a simple and affordable way to add event-based video recording to web-based access control, without having to invest in a DVR or NVR.

NetAXS-123 is simple, scalable and flexible. And now with video it's even better.

- No NVR or DVR required
- Records video when events occur—reduces need for extensive storage
- Retrieve and export stored video
- View live video and record from up to 3 cameras

Awarded to NetAXS-123 2011

Performance Series Cameras and DVRs

Honeywell's Performance Series includes high performing cameras and digital video recorders. The DVR series features web browser support that enables remote live view and video search. The camera series is powered by 12 VDC and armed with 1/3" SONY Super HAD CCD image sensors that provide sharper image quality. Easy to install and even easier to use, Honeywell's Performance Series offering is ideal for entry to mid-size applications.

- Indoor mini-dome, IP and analog
- Outdoor mini-dome, IP and analog
- Bullet camera
- PTZ
