

Know You're Covered With Honeywell Mobile Video Security Solutions

Honeywell's mobile video security solutions — available in both digital and analog models — can be mounted anywhere inside a vehicle, giving you maximum video coverage — anytime, anywhere. And thanks to our exclusive hard drive Shock and Vibration Reduction (SaVR™) technology, you can rest assured that your data clips are reliably captured and safely stored — even on the roughest roads.

Mobile Video Security Solutions

| | |
|---|---|
| HTRD400 Series Mobile Digital Data Recorders | Captures up to four channels of sharp video and clear audio; available with wireless access and up to 80 GB of storage. |
| HTCD50/52 Mobile Digital Camera Series | High-impact, tamper-resistant camera that delivers high-quality digital video for the HTRD400. |
| HTRD100 Series Mobile Digital Data Recorders | Features one audio and two video inputs; great system for upgrading from analog to digital. |
| HTR62 Mobile VCR Video Recorder | An economical choice that doesn't compromise on features and durability, the HTR62 provides up to nine hours of VHS recording time. |
| HTC70 Mobile Camera Series | Analog day/night camera that provides quality video in all light conditions. |
| HTC29 Angle Dome Series | Analog dome camera with the flexibility for use in a variety of locations. |
| HTGPS Receiver Series | Sophisticated yet easy to use, the HTGPS provides position, speed and direction information that can be tied to the video surveillance data for the analog and digital recorders. |
