

## Remote Live View for HREP DVRs from Apple Mac Computers Application Note

This document describes how to remotely connect to the HREP DVR from an Apple™ Mac computer to view live video and make DVR configuration changes.

---

**Note** DVR setup access is dependent on user privileges.

---

Although this document only refers to the Safari web browser (which typically comes pre-loaded on all Macs), these instructions also apply to Mozilla™ Firefox and Google™ Chrome web browsers.

---

**Note** Remote search and playback of HREP recorded video is not currently supported when remotely accessing the HREP DVR from Mac.

---

---

## Requirements

---

- Apple™ Mac computer running OSX Leopard or newer operating system
- Safari internet browser version 5.1.2 or greater

---

## Procedure

---

1. At the HREP DVR, configure its network settings as you normally would when enabling remote connection via Windows Internet Explorer (see the HREP 4/8/16-Channel DVR user manual).
2. On your Mac, launch Safari and, in the address bar at the top, enter the IP address and the web port number of the target HREP DVR.  
**Example:** For a DVR using IP address 192.168.0.102, and web port number 8080, enter: **192.168.0.102:8080** into the web browser address field.
3. When prompted, enter the case-sensitive user Name (login) and Password.

You should now have access to the Live (video), Setup (provided you have been granted access), and Information tabs.

For accessing the Live, Setup, and Remote tabs, refer to the HREP4/8/16 Color DVR User Guide that came with your HREP DVR.
