

HPTV09

POWER DISTRIBUTION PANEL

The Honeywell HPTV09 distribution panel distributes single 24 VAC or 12 VDC inputs to 9 individual outputs. The distribution panel is ideal for powering video cameras, mini-domes and the ExitView™.

Each output is protected with a 250 mA SmartFuse circuit breaker to prevent any shorted output from disabling the other outputs. The HPTV09 requires a 12 VDC or 24 VAC power source (not included) to be connected to either a terminal block or a 2.1 mm power jack. Incoming power and individual channel power is indicated by LEDs.

Market Opportunities

The compact HPTV09 is a perfect product to use to supply power to a wide variety of cameras (boxed, mini-dome, and ExitView). Its compact size and ease of use make it an ideal choice in small installations.

The HPTV09 can also economically expand the capabilities of an existing indoor power supply simply by connecting it to one output of the existing unit.
